Results

Conclusion

# How Well Sentence Embeddings Capture Meaning

Lyndon White   Roberto Togneri   Wei Liu  
Mohammed Bennamoun

The University of Western Australia

## Sentence embeddings are vector representations

White et al.

### Introduction

Method

Corpus Preparation

Models

Results

Conclusion

- Extension beyond word embeddings
- The various models produce embeddings as bi-products
- As they are bi-products what features are represented is not clear.

# What could they represent?

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

Some combination of

- Word content
- Syntactic structure
- Subject
- **Semantic Polarity**
- Meaning
- Noise
- other factors

*(Parsing)*

*(Topic Classification)*

*(Sentiment Analysis)*

## Comparison to human similarity rankings

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

- Have humans rank, or score sample sentences on similarity.
- Evaluate embedding methods by looking for correlations.
- On current methods Gershman and Tenenbaum found generally poor results.

---

S. J. Gershman and J. B. Tenenbaum, "Phrase similarity in humans and machines," *Proceedings of the 37th Annual Conference of the Cognitive Science Society*, 2015, J. Mitchell and M. Lapata, "Vector-based models of semantic composition.," in *ACL*, 2008, pp. 236–244.

## Classification by positional meaning

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

Category	Example
Adhesion to Vertical Surface	There is a magnet on the refrigerator.
Support by Horizontal Surface	There is an apple on the refrigerator.
Support from Above	There is an apple on the branch.
Full Containment	There is an apple in the refrigerator.
Partial Containment	There is an apple in the water.

- Categorise sentences based on the positional component of their meaning.
- Ritter et. al. found sum of word embeddings to outperform all more complex models.

---

S. Ritter, C. Long, D. Paperno, M. Baroni, M. Botvinick, and A. Goldberg, "Leveraging preposition ambiguity to assess compositional distributional models of semantics," *The Fourth Joint Conference on Lexical and Computational Semantics*, 2015.

## Classification by positional meaning

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

Category	Example
Adhesion to Vertical Surface	There is a magnet on the refrigerator.
Support by Horizontal Surface	There is an apple on the refrigerator.
Support from Above	There is an apple on the branch.
Full Containment	There is an apple in the refrigerator.
Partial Containment	There is an apple in the water.

- Our work broadens this to classify on complete sentence meaning
- It also complements it by working with real world sentences – where overlap does matter.

S. Ritter, C. Long, D. Paperno, M. Baroni, M. Botvinick, and A. Goldberg, “Leveraging preposition ambiguity to assess compositional distributional models of semantics,” *The Fourth Joint Conference on Lexical and Computational Semantics*, 2015.

# When are sentences equivalent?

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

## Bidirectional Entailment

$A$  and  $B$  are semantically equivalent iff

$$A \models B \wedge B \models A$$

and we call  $A$  and  $B$  **paraphrases**

- The staff were rude.
- The service was impolite.
- The staff showed no respect.
- It could have been better.

# When are sentences equivalent?

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

## Bidirectional Entailment

$A$  and  $B$  are semantically equivalent iff

$$A \models B \wedge B \models A$$

and we call  $A$  and  $B$  **paraphrases**

## Equivalence Relation

This is an equivalence relation, and so gives rise to a partitioning of all sentences by meaning.

# Sentence partitions should map to vector partitions

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

# How to Evaluate this?

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

- Know the partitions in sentence space
- Examine the partitions in the vector space
- See if they are **good**

# What is good?

- Concentrated
  - All sentences with same meaning go to small area.

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

# What is good?

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

- Concentrated
  - All sentences with same meaning go to small area.
- Distinct
  - Should not overlap, should be separate

# What is good?

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

- Concentrated
  - All sentences with same meaning go to small area.
- Distinct
  - Should not overlap, should be separate
- Simple
  - No twists, bulges etc in vector spaces

# Evaluate with a Semantic Classification Task

White et al.

Introduction

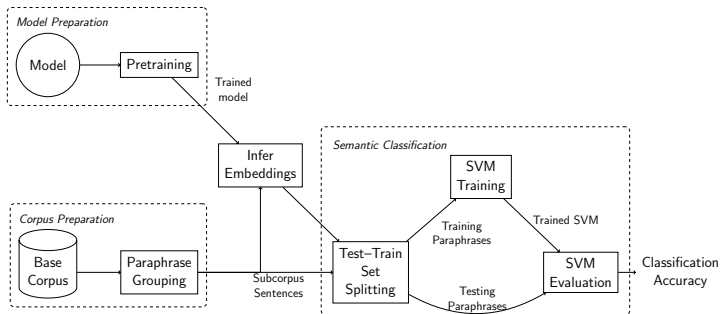

Method

Introduction

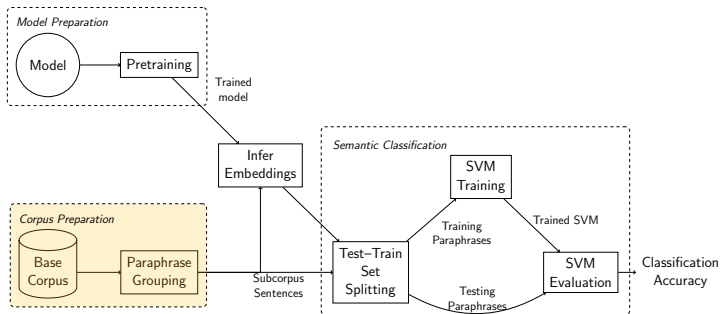

Method

**Corpus Preparation**

Models

Results

Conclusion

# The MSRP Corpus

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

- Microsoft Research Paraphrase Corpus
- gathered from online news sources
- Pairwise paraphrase detection tests
- Take transitive and symmetric closures

## Grouping via closure

If  $A$  is a paraphrase of  $B$ , and  $B$  is a paraphrase of  $C$ , then the paraphrase group  $\{A, B, C\}$  exists.

---

W. B. Dolan and C. Brockett, "Automatically constructing a corpus of sentential paraphrases," in *Third International Workshop on Paraphrasing (IWP2005)*, Asia Federation of Natural Language Processing, 2005.

# The MSRP Corpus

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

- Microsoft Research Paraphrase Corpus
- gathered from online news sources
- Pairwise paraphrase detection tests
- Take transitive and symmetric closures

859 sentences, divided into 273 groups.

---

W. B. Dolan and C. Brockett, "Automatically constructing a corpus of sentential paraphrases," in *Third International Workshop on Paraphrasing (IWP2005)*, Asia Federation of Natural Language Processing, 2005.

# Paraphrase groups from MSRP

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

- only intel corp. has a lower dividend yield .
- only intel 's 0.3 percent yield is lower .
- only the intel corporation has a lower dividend yield .
- only intel corp. 's 0.3 percent yield was lower .

# Paraphrase groups from MSRP

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

- three such vigilante-style attacks forced the hacker organizer , who identified himself only as “ **eleonora67** , ” to extend the contest until **6 p.m. edt sunday**.
- three such vigilante-style attacks forced the hacker organizer , who identified himself only as “ **eleonora [ 67 ]** , ” to extend the contest until **7 p.m. est sunday**.
- three such vigilante-style attacks forced the hacker organiser , who identified himself only as “ **eleonora67 ]** , ” to extend the contest until **8am ( aest ) today**.
- three such vigilante-style attacks forced the hacker organizer , who identified himself only as “ **eleonora [ 67 ]** , ” to extend the contest until **3 p.m. arizona time sunday**.

# Paraphrase groups from MSRP

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

- belcher said the airport 's conference room **was serving as a makeshift** shelter for several **area families** who hiked up the **wooded hillside** in advance of rising water .
- belcher said the airport 's conference room **became** a shelter for several **area families** who had hiked up **wooded hillsides** in advance of rising water .
- belcher said the airport 's conference room **became** a shelter for several **families** who had hiked up **hillsides** ahead of rising water .

# Issues with MSRP Corpus

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

## Difficulty:

- Often **intra-group** differences only in single word or punctuation.
- Often **inter-group** sentences differs entirely in topic

---

W. B. Dolan and C. Brockett, "Automatically constructing a corpus of sentential paraphrases," in *Third International Workshop on Paraphrasing (IWP2005)*, Asia Federation of Natural Language Processing, 2005.

# Issues with MSRP Corpus

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

## Difficulty:

- Often **intra-group** differences only in single word or punctuation.
- Often **inter-group** sentences differs entirely in topic

## Loose Semantic Equivalence

“:the majority of the equivalent pairs in this dataset exhibit ‘**mostly bidirectional entailments**’, with one sentence containing information ‘that differs’ from or **is not contained in the other.**”

---

W. B. Dolan and C. Brockett, “Automatically constructing a corpus of sentential paraphrases,” in *Third International Workshop on Paraphrasing (IWP2005)*, Asia Federation of Natural Language Processing, 2005.

# The Opinosis Corpus

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

- Collection of highly redundant opinions
- Intended for evaluation of Summarisation algorithms
- Required manual partitioning

About:

- Electronics
- Hotels
- Auto-mobiles

---

K. Ganesan, C. Zhai, and J. Han, "Opinosis: A graph-based approach to abstractive summarization of highly redundant opinions," in *Proceedings of the 23rd International Conference on Computational Linguistics*, Association for Computational Linguistics, 2010, pp. 340–348.

# The Opinosis Corpus

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

- Collection of highly redundant opinions
- Intended for evaluation of Summarisation algorithms
- Required manual partitioning

521 Sentences, divided into  
89 groups

---

K. Ganesan, C. Zhai, and J. Han, "Opinosis: A graph-based approach to abstractive summarization of highly redundant opinions," in *Proceedings of the 23rd International Conference on Computational Linguistics, Association for Computational Linguistics*, 2010, pp. 340–348.

# Paraphrase groups from Opinois

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

- Perfect Location and Lovely Inn
- Great hotel, nice location for everything !
- Loved this hotel and location !
- A great hotel in a great location
- Great Hotel in a Great Location
- Overall though, the location was great and the hotel was nice .
- Lovely hotel and excellent location .

# Paraphrase groups from Opinois

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

- So, the location was awesome .
- Again, the location was great !
- You cannot beat the location !
- The location could not be any better .
- In addition, it is location, location, location .
- That said, the location is marvelous .

# Paraphrase groups from Opinois

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

- Best location in Fisherman's Wharf .
- Perfect location to Fishermans Wharf .
- Perfect Fisherman's Wharf Location
- Perfect location near Fisherman's Wharf .
- The location is great, only 2 blocks from Fisherman's Wharf .

# Models and Model Preparation

**Models**

Results

Conclusion

# Bag of Words (BOW / PCA BOW)

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

## Bag of Words

A vector of word occurrence counts. It's length is equal to the vocabulary size.

---

H. Hotelling, "Analysis of a complex of statistical variables into principal components.," *Journal of educational psychology*, vol. 24, no. 6, p. 417, 1933.

# Bag of Words (BOW / PCA BOW)

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

## Bag of Words

A vector of word occurrence counts. It's length is equal to the vocabulary size.

## Why Principle Component Analysis?

Unsupervised dimensionality reduction, to test if BOW performance was due to is very large number of dimensions.

---

H. Hotelling, "Analysis of a complex of statistical variables into principal components.," *Journal of educational psychology*, vol. 24, no. 6, p. 417, 1933.

# Sum/Mean of Word Embeddings

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

- Simply adding up word embeddings
- We used pretrained Google News skip grams

## Identical Cosine Similarities

for representations of sentences  $A$  and  $B$ :

SOWE:  $s_A, s_B$

MOWE:  $m_A, m_B$

$$d_{\cos}(s_A, s_B) = d_{\cos}(m_A, m_B)$$

---

Conclusion

## Semantic Classification Success Rate

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

# Limitations

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

- Embedding Training corpus distinct from Evaluation Corpus
- URAE playing at disadvantage
  - 200 dim to others 300 dim
- Only linearly separable partitioning considered.

# Conclusion

White et al.

Introduction

Method

Corpus Preparation

Models

Results

Conclusion

- Evaluate the vector space partitioning, by semantic equivalence.
- using linear SVM for semantic classification task
- BOW, MOWE and SOWE unexpectedly strong
- Word content matters, and must be preserved
